

## MARK BOWEN

### Reading / book signing

Sunday, March 3, 6–7 pm

## MARK BOWEN

from his new book  
*The Telescope In The Ice*

**Mark Bowen**, physicist, writer, alpinist, will sign and read from his most recent book, *The Telescope In the Ice* (St. Martin's Press, 2017), a compelling chronicle about the building of the IceCube neutrino observatory at the South Pole. "A masterpiece of storytelling." – **Alan Lightman**. Bowen's previous books are both about climate science and global warming: *Censoring Science* (Dutton, 2007) and *Thin Ice: Unlocking the Secrets of Climate in the World's Highest Mountains* (Henry Holt and Company, 2005). "One of the best books yet published on climate change." – **Bill McKibben**.

Books will be available for sale from **Trident Booksellers**.

This reading is held in conjunction with an exhibition which features  
*Intemperate Zone*, a collaborative installation by  
**NANCY SELVAGE** and **ROS ZIMMERMANN**

**February 27 – March 31, 2019**

Gallery Hours: Wednesday – Sunday 12–6 pm

Words, punctuation marks, and international meteorology symbols burn, freeze, bleed, and blow within a collection of sculptural objects: ...*(ontinued disturban(es, weathervein, ice corps, and under the weather hats. Real and imagined atmospheric conditions and states of mind unfold as do the perceptions of our role in the process.*
